

Science Directions - 1st Grade - Math & Science Night

Directions for Light Center:

1. Use one "Types of Light" Game board with attached objects.
2. Shine flashlight through the objects to decide if they are OPAQUE, TRANSLUCENT, or TRANSPARENT
3. Place object in the correct column once you/your group has decided that it belongs.
4. Discuss how light filters through objects differently depending on how clear or solid they are compared to one another.

Directions for Sound Center:

1. Use one "Eggs-Full of Sound" Game Board with 12 attached picture pieces.
2. Shake each Easter egg to guess what object is inside.
3. Place your picture piece on the numbered egg for your guess.
4. Check your answer choices AFTER all 12 eggs are shaken & guessed by the individual/group.
5. Move your picture piece to the correct egg, if it was a wrong guess.
6. Discuss how objects make sounds differently depending on what they are made of and how heavy they are compared to each other.
